1. **Website** Specifications

The objective of this website is to build a platform where musicians / artists can browse and pay for beats, whilst also giving producers a chance to upload and sell their beats aswell. This website aims to connect artists and producers in one digital marketplace.

Business Goals:

- Allow artists to quickly browse for beats
- Provide a platform for beat producers to monetize their music
- Build a user-friendly system for buying and selling beats

Target audience

Primary Audience:

- Music artists (rappers and singers)
- Age : 16 – 30 years old
- Interests : music recording and production

Secondary Audience:

- Beat producers
- Age : 18 – 30 years old
- Interests : music production / engineering and selling beats

Type of Website

This will be an e-commerce website that allows users to preview beats, upload content and purchase and download beats.

2. **Taxonomy / information design**

The website will be designed to ensure smooth interaction between artists and producers. The navigation will follow a simple structure to ensure that users can access all important pages within the home page.

Key Features & User Interaction

- Artists will be able to preview beats directly from the homepage.
- Producers will be able to register and upload their beats.
- Users will navigate easily between pages using a navigation bar.

Navigation Flow

- The **Home page** will display featured beats with preview options.
- The **Browse Beats page** will allow users to explore available beats.
- The **Licensing page** will be used to show different purchasing options for beats.
- The **Contact page** will provide communication between users and the platform.
